## **DETAILED ACTION**

### ***Response to Arguments***

1. Applicant's arguments, see pg. 3, 4<sup>th</sup> paragraph, filed 18 March 2005, with respect to 1-10 have been fully considered and are persuasive. The USC 102 (b) rejection of claims 1-10 has been withdrawn.

### ***Drawings***

2. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: 216. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### ***Claim Rejections - 35 USC § 112***

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 3731

4. Claims 3-5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

5. Claims 3-5 recites the limitation "said unitary tensioner body" in line 3 of each claim. There is insufficient antecedent basis for this limitation in the claim.

***Claim Rejections - 35 USC § 102***

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claims 1, 3-6, and 8-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Lock Des. 233312.

8. Lock teaches a tension for a surgical tape, the tensioner comprising attaching means; holding means; wherein the attaching means comprises an elongated slot through the unitary tensioner body; wherein the holding means comprises a circular opening through the unitary tensioner body; and wherein the holding means comprises an elongated slot through the unitary tensioner body.

9. Claims 11-13 are rejected under 35 U.S.C. 102(b) as being anticipated by Skakoon 5232193.

10. Skakoon teaches a method of clamping, the method comprising the steps of: attaching a tension, having a unitary body, to a length of surgical tape; passing a portion of the surgical tape around the elongated body structure; and securing the surgical tape in place by inserting a section of the surgical tape into a gripping portion of the tensioner; wherein the attaching step comprises securing a free end of the length of

Art Unit: 3731

surgical tape in a slot in the tensioner; wherein the securing step comprises threading the length of surgical tape through an opening in the tensioner.

**FIG. 1**

### ***Claim Rejections - 35 USC § 103***

11. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3731

12. Claims 2 and 7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lock.

13. Lock teaches the tensioner of claims 1 and 6. It should be noted that Lock fails to teach wherein the tensioner is formed of plastic. It would have been obvious to one having ordinary skill in the art at the time the invention was made to make the tensioner of Lock out of plastic, since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. *In re Leshin*, 125 USPQ 416. Also it is common knowledge to those of ordinary skill to choose a material that has sufficient strength for the intended use of that material. Furthermore, it is well known in the art of surgical clips/clamps to use plastic as evidenced by US Patents 2889848, 3357674, 3374509, 4434963, 5017192, 5401256. Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to use plastic to form the tensioner because it is inexpensive and its rigid, long lasting characteristics.
